

**PRE-AWARD AUDIT OF ROLLING STOCK PURCHASES**  
**49 CFR PART 663**  
**BUY AMERICA CERTIFICATION**

Kentucky Public Transit Association D/B/A/ KPTA hereby certifies that the rolling stock to be procured through a contract with Mid-South Bus Center Meets the requirements of Section 165(a), or (b) (3), of the Surface Transportation Assistance Act of 1982, as amended, and hereby submits its Buy America Audit prepared by someone other than the above manufacturer or its agent which lists both the Chassis and Conversion:

- (1) Components and subcomponent parts of the rolling stock identified by manufacturer of the parts, their country of origin and costs; and
- (2) The location of the final assembly point for the rolling stock, including a description of the activities that will take place at the final assembly point and the cost of final assembly.

The above information is attached.

Signature Shirley L. Cummings

Title Vice President

Date: December 29, 2010

\*\*\*\*\*

The \_\_\_\_\_ certifies that it has obtained and is submitting the letter from the Federal Transit Administration (FTA) granting a waiver from the Buy America requirements under section 165(b)(1), (b)(2), or (b)(4) of the Surface Transportation Assistance Act of 1982, as amended, for the rolling stock to be purchased through a contract with Kentucky Public Transit Association D/B/A/ KPTA under Project No. \_\_\_\_\_ The above letter is attached.

Assumptions

- \* Non-Ford manufacturing facilities are noted.
- \* Percentages include prorated direct assembly labour, engineering costs, overhead, other costs, and profit.
- \* Component material costs based on 2010 Bill of Material.
- \* Costs are for vehicles pertaining to the Whitmanford request. Content for other E-Series vehicles could be different.
- \* E-Series vehicles are assembled at Ohio Assembly Plant, OH, USA.

This document may contain confidential business information. It is being supplied with the understanding that it will not be released to third parties, and that it will be used solely for the purpose of complying with the Buy America requirements of federal law or other applicable content requirements.

**PRE-AWARD AUDIT OF ROLLING STOCK PURCHASES  
49 CFR PART 663**

**CERTIFICATION OF COMPLIANCE WITH FEDERAL MOTOR VEHICLE SAFETY STANDARDS**

Kentucky Public Transit Association D/B/A/ KPTA hereby provides its self-certification that the rolling stock to be procured through a contract with the Mid-South Bus Center Complies with the FMVSS issued by the National Highway Traffic Safety Administration in part 571 of this title and complies with the relevant Federal Motor Vehicle Safety Standards (FMVSS).

Signature Stivley L. Cummins

Title Vice President

Date December 29, 2010

**The Bidder must attach its self-certification on Company letterhead that the vehicle it proposes to supply meets or exceeds the FMVSS. A copy of the testing at Altoona, PA must be included as a part of the bid.**

\*\*\*\*\*

The \_\_\_\_\_ certifies that it has obtained and will keep on file its certification that it received a statement from the manufacturer that the rolling stock to be purchased under this part is not subject to the FMVSS issued by the National Highway Traffic Safety Administration in part 571 of this title. (This subpart shall not apply to rolling stock that is not a motor vehicle.)

**Above statement is included on Company letterhead.**

## Federal Motor Vehicle Safety Standards

The following is a brief summary of all applicable **FMVSS Title 49 (Federal Motor Vehicle Safety Standards)** of which Supreme Startrans Buses complies. Complete and up to date copies of the FMVSS worksheets supporting test data is available upon request by calling 1-877-258-1391 or writing to Supreme Corporation, Startrans Bus Division, P.O. Box 463, Goshen, IN 46528.

**Definitions:** OEM                      Original Equipment Manufacturer  
FSM                                      Final Stage Manufacturer

### **FMVSS 101 Control Location, Identification and Illumination**

\* This is certified by the OEM and the FSM does not alter these controls.

### **FMVSS 102 Transmission Shift Lever Sequence & Starter Interlock**

\* This is certified by the OEM and the FSM does not alter their system.

### **FMVSS 103 Windshield Defrosting and Defogging System**

\* This is certified by the OEM and the FSM does not alter their system.

### **FMVSS 104 Windshield Wiping and Washing System**

\* This is certified by the OEM and the FSM does not alter their system.

### **FMVSS 105 Hydraulic Brake System**

\* This is certified by the OEM and the FSM does not alter their system.

### **FMVSS 106 Brake Hoses**

\* This is certified by the OEM and the FSM does not alter their hoses.

### **FMVSS 107 Reflecting Surfaces**

\* This is certified by the OEM and the FSM does not alter their system. The add-on FSM control console is in compliance.

### **FMVSS 108 Lamps, Reflective Devices & Associated Equipment**

\* The devices installed by the OEM and the FSM meet all requirements.

### **FMVSS 111 Rearview Mirrors**

\* The mirrors added by the FSM meet all requirements.

### **FMVSS 112 Headlamp Concealment Devices**

\* This is certified by the OEM and the FSM does not alter their system.

**FMVSS 113 Hood Latch System**

\* This is certified by the OEM and the FSM does not alter their system.

**FMVSS 115 Vehicle Identification Number**

\* This is certified by the OEM and the FSM does not alter their numbers.

**Federal Motor Vehicle Safety Standards**

**FMVSS 116 Hydraulic Brake Fluids**

\* This is certified by the OEM and the FSM does not alter their system.

**FMVSS 120 Tire Selection and Rims for Motor Vehicles Other Than Passenger Cars**

\* This is certified by the OEM and the FSM does not alter their tires or rims.

**FMVSS 124 Accelerator Controls**

\* This is certified by the OEM and the FSM does not alter their system.

**FMVSS 125 Warning Devices**

\* This is not a requirement of the OEM or FSM. This is a requirement the end user must meet.

**FMVSS 205 Glazing Material (Windows)**

\* The windows supplied by the OEM and the FSM meet all requirements.

**FMVSS 207 Seating Systems**

\* The seating supplied by the OEM and the FSM meet all requirements.

**FMVSS 208 Occupant Crash Protection**

\* This is certified by the OEM and the FSM does not alter their system.

**FMVSS 209 Seat Belt Assemblies**

\* The seat belts supplied by the OEM and the FSM meet all requirements.

**FMVSS 210 Seat Belt Assemblies Anchorages**

\* The seat belt assemblies' anchorages supplied by the OEM and the FSM meet all requirements.

**FMVSS 217 Bus Window Retention and Release**

\* The windows installed by the FSM meet all requirements.

**FMVSS 220 School Bus Rollover Protection**

\* The FSM bus body meets all requirements.

**FMVSS 221 School Bus Body Joint Strength**

\* Even though this is not a requirement for transit buses, Supreme has tested to this standard and meets all requirements.

**FMVSS 301 Fuel System Integrity**

\* This is certified by the OEM and the FSM does not alter their system.

**FMVSS 302 Flammability of Interior Materials**

\* The interior materials supplied by the OEM and the FSM meet all requirements.

## EXECUTIVE SUMMARY

Supreme Corp. submitted a model Startrans E-Lo Low Floor, gasoline-powered 20 seat (including the driver) 26-foot bus, for a 7 yr/200,000 mile STURAA test. The test bus is built on a Ford Motor Co. E-450 Super Duty chassis. The odometer reading at the time of delivery was 526 miles. Testing started on January 19, 2010 and was completed on June 25, 2010. The Check-In section of the report provides a description of the bus and specifies its major components.

The primary part of the test program is the Structural Durability Test, which also provides the information for the Maintainability and Reliability results. The Structural Durability Test was started on February 16, 2010 and was completed on May 6, 2010.

The interior of the bus is configured with seating for 20 passengers including the driver plus 1 wheelchair position. Free floor space will accommodate 14 standing passengers resulting in a potential load of 34 persons plus 1 wheelchair position. At 150 lbs per person and 600 lbs per wheelchair position, this load results in a measured Gross Vehicle Weight (GVW) of 16,450 lbs. The first segment of the Structural Durability Test was performed with the bus loaded to a GVW of 16,450 lbs. **Note: at Gross Vehicle Load (GVL) the weight of the rear axle is 1,980 lbs over the rear GAWR and 1,950 lbs over the GVWR.** The middle segment was performed at a Seated Load Weight (SLW) of 14,350 lbs. **Note: at SLW the load is 130 lbs over the rear GAWR.** The final segment was performed at a Curb Weight (CW) of 10,570 lbs. Durability driving resulted in unscheduled maintenance and failures that involved a variety of subsystems. A description of failures and a complete and detailed listing of scheduled and unscheduled maintenance is provided in the Maintainability section of this report.

Effective January 1, 2010 the Federal Transit Administration determined that the total number of simulated passengers used for loading all test vehicles will be based on the full complement of seats and free-floor space available for standing passengers (150 lbs per passenger). The passenger loading used for dynamic testing will not be reduced in order to comply with Gross Axle Weight Ratings (GAWR's) or the Gross Vehicle Weight Ratings (GVWR's) declared by the manufacturer. Cases where the loading exceeds the GAWR and/or the GVWR will be noted accordingly. During the testing program, all test vehicles transported or operated over public roadways will be loaded to comply with the GAWR and GVWR specified by the manufacturer.

Accessibility, in general, was adequate, components covered in Section 1.3 (Repair and/or Replacement of Selected Subsystems) along with all other components encountered during testing, were found to be readily accessible and no restrictions were noted.

The Reliability section compiles failures that occurred during Structural Durability Testing. Breakdowns are classified according to subsystems. The data in this section are arranged so that those subsystems with more frequent problems are apparent. The problems are also listed by class as defined in Section 2. The test bus encountered no

Class 1 or Class 2 failures. Of the 10 reported failures, 8 were Class 3 and 2 were Class 4.

The Safety Test, (a double-lane change, obstacle avoidance test) was safely performed in both right-hand and left-hand directions up to a maximum test speed of 45 mph. The performance of the bus is illustrated by a speed vs. time plot. Acceleration and gradeability test data are provided in Section 4, Performance. The average time to obtain 50 mph was 16.03 seconds. The Stopping Distance phase of the Brake Test was completed with the following results; for the Uniform High Friction Test average stopping distances were 26.44' at 20 mph, 54.17' at 30 mph, 89.31' at 40 mph and 112.13' at 45 mph. The average stopping distance for the Uniform Low Friction Test was 24.84'. There was no deviation from the test lane during the performance of the Stopping Distance phase. During the Stability phase of Brake Testing the test bus experienced no deviation from the test lane but did experience pull to the left during both approaches to the Split Friction Road surface. The Parking Brake phase was completed with the test bus maintaining the parked position for the full five minute period with no slip or roll observed in both the uphill and downhill positions.

The Shakedown Test produced a maximum final loaded deflection of 0.290 inches with a permanent set ranging between -0.005 to 0.006 inches under a distributed static load of 12,300 lbs. The Distortion Test was completed with all subsystems, doors and escape mechanisms operating properly. No water leakage was observed throughout the test. All subsystems operated properly.

The test bus submitted for testing was not equipped with any type of tow eyes or tow hooks, therefore, the Static Towing Test was not performed. The Dynamic Towing Test was performed by means of a front-lift tow. The towing interface was accomplished using a hydraulic under-lift wrecker. The bus was towed without incident and no damage resulted from the test. The manufacturer does not recommend towing the bus from the rear; therefore, a rear test was not performed. The Jacking and Hoisting Tests were also performed without incident. The bus was found to be stable on the jack stands, and the minimum jacking clearance observed with a tire deflated was 3.9 inches.

A Fuel Economy Test was run on simulated central business district, arterial, and commuter courses. The results were 6.35 mpg, 6.35 mpg, and 10.74 mpg respectively; with an overall average of 7.19 mpg.

A series of Interior and Exterior Noise Tests was performed. These data are listed in Section 7.1 and 7.2 respectively.

PRE-AWARD AUDIT OF ROLLING STOCK PURCHASES  
49 CFR PART 663

PURCHASER'S REQUIREMENTS CERTIFICATION

Kentucky Public Transit Association D/B/A/ KPTA hereby certifies that the rolling stock to be purchased through a contract with Mid-South Bus Center Is the same product described in the solicitation specifications; and that the proposed manufacturer is a responsible manufacturer with the capability to produce a vehicle that meets the specifications set forth in the solicitation for bids.
